RE: Freight Rail Infrastructure Improvement Program (FRIIP) - NCWRPC Intermodal Feasibility Study Application

Dear Ms. Stern:

Union Pacific Railroad has reviewed a copy of the North Central Wisconsin Regional Planning Commission's (NCWRPC) 2020 FRIIP application for funding to conduct a study to accomplish the following:

- Identification of intermodal service requirements, potential container volumes and a potential location of a terminal in the state, which would benefit Wisconsin users.
- Review of demand findings and a final report which outlines potential next steps for intermodal development.

In support of NCWRPC's application, Union Pacific will consider providing non-proprietary information which may influence container demand, terminal design requirements and railroad network service design factors.

In addition, while Union Pacific is not obligated to provide financial support to complete the study, the study team has requested Union Pacific's participation in a kick-off meeting, as well as intermediate milestone and final report review.

Please feel free to contact me if you have any questions.

Sincerely,

Liisa Stark
